

## How to unzip the files you downloaded?

Once you have downloaded your file and have saved it to your computer.

The file will come as a .zip file. Windows XP and newer has a built in program that will unzip a compressed file. Or Winzip could also be used. ([www.winzip.com](http://www.winzip.com))

## Extract a Zip file in Mac OS X

Unzipping files in Mac OS X:

Open "Finder" and navigate to the Zip file you wish to unzip.

Double-click the file you wish to unzip.

The files contained within the Zip file should now be automatically unzipped into the same folder as the original Zip file.
